EDUCATION

Duke University

B.S. in Mechanical Engineering | Minors in Computer Science, Visual Media Studies

Aug 2023 – Present

Stuyvesant High School

Sep 2019 – Jun 2023

EXPERIENCE

Siemens Smart Infrastructure

Technical Product Management Intern – Customer Experience Team

Jun 2026 – Present

Wendell, NC

- Led product discovery across a global support org through user interviews and journey / process mapping, surfacing bottlenecks and hand-off gaps that were stalling cases.
- Drove process standardization and operating-model design (routing, ownership, SOPs), helping cut average case close time 96% and clear the aged-case backlog to 0 open cases.
- Authored the business case and roadmap for a "Case-to-Knowledge" AI product that turns cases, engineering corrections, and project learnings into a reusable, AI-ready knowledge base.
- Drove cross-functional alignment across field service, PLM, IT, and business teams, consolidating overlapping use cases into a single prioritized set of requirements.

Amgen

Operations Engineering Intern

Jun 2025 – Sep 2025

Thousand Oaks, CA

- Analyzed maintenance data for 1,000+ assets and 20+ stakeholders to target 8% downtime savings.
- Built centralized Smartsheet dashboards as a single source of truth for POs, QA, schedulers, and engineers, streamlining scheduling workflows and regulatory-compliance tracking.

UnlockedMaps

Product Engineer Intern

May 2025 – Aug 2025

Remote

- Ran a UX audit and redesigned the city directory interface; shipped frontend fixes (HTML/CSS/JS) improving information architecture, mobile responsiveness, and WCAG accessibility.
- Architected a WMATA transit API integration end-to-end to launch the product into the DC market.

Duke Institute for Brain Sciences (DIBS)

Research Fellow

May 2024 - August 2024

Durham, NC

- Developed MySQL database and metadata tagging system for large-scale interactive installations.

FRC Robotics Team 694

Engineering Lead & Director of Lab Operation

Sep 2019 – May 2023

New York, NY

- Led a 50+ person division in end-to-end robot R&D, securing 13 awards over 2 seasons; directed lab operations for 150+ members, establishing safety protocols and machine-shop training.

PROJECTS

- **Modular Lunch Tray System:** Worked with Durham Public Schools as a part of 5-person design team to develop a patent-pending "Slide n' Lock" modular tray; led user research, CAD, iterative prototyping, and DFM for injection molding, securing grant funding for production scale-up.
- **Project Tadpole:** Built accessible, user-friendly play, including "switch-adapted" commercial toys, retrofitted ride-on cars for limited-mobility users, and modular tactile mats for sensory learning.

SKILLS

- **Skills:** Product Discovery, User Research, Product Strategy, Roadmapping, Stakeholder Management, Data Analysis, Agile Methodologies, Cross-Functional Collaboration, User Stories
- **Technical:** Python, SQL, AI/LLM Applications, AWS, APIs, Git
- **Tools:** Figma, Jira, Salesforce, Tableau, Power BI, Visio, Miro, Smartsheet, Airtable, CAD

PATENTS & PUBLICATIONS

- Co-authored 2 peer-reviewed papers (*Science Advances*, *Sensors & Actuators B*) and filed 1 US Patent (App. No. 29/936,005).
